

OCCUPATIONAL HEALTH & SAFETY II

TERM HOMEWORK

(Due Date: May 31, 2024)

It can definitely be pronounced that recently there has been great changes in human life as we are introduced with increasingly more competent applications in engineering, new practices in agriculture and new challenging approaches in overall health sector. Therefore, it would not be wrong to say that all the above advancements have triggered the technology to jump to another level.

In the light of what is written above, discuss the new problems and impositions we all face in the globalizing world, especially in the food industry, created by all these new practices. Also comment in detail the awaiting solutions for these problems making references especially to occupational health and safety.

Add relevant figures if you have any. Do not forget to give the references you used. Your references should also include the web pages you used on the internet for this purpose. The paper should be between 3-4 pages.
